AI for HR1 Communications *Project Overview*

- **Goal:** Create a practical guide states can use for HR1 implementations
- **Focus:** AI applications for member communications
- **Team:** 12 active members, 3 states represented
- **Output:** 20-page user guide and webpage reference tool

Approach

AI for HR1 Communications

What's in the Guide

1. Use Cases
2. Communication Vehicles
3. Foundational Principles
4. Guardrails for Deployment
5. Engaging Community Stakeholders
6. Data Strategy
7. AI Training and Monitoring
8. System Interconnectivity Standards
9. Risks and Benefits
10. Considerations for States

AI for HR1 Communications

Why AI will be useful

Reach

- Personalized, multi-channel outreach at scale
- Helps address bias through language and accessibility features

Activation

- Scheduled prompting for members who are disengaged or stalled
- Provides education and verification assistance

Productivity

- Frees up staff for more complex work
- Cost and time savings for customer service agents

Speed

- Enables rapid deployment of policy and operational changes
- Facilitates faster training updates and provides staff with 24/7 information sources

AI for HR1 Communications

9 AI Use Cases

1. Education and Information

2. Process Completion Support

3. Activating Non-Responsive Members

4. Policy Translation and Simplification

5. Personalized Outreach

6. Contact Center and Self-Service Support

7. State Employee Knowledge Support

8. Member Journey Stress Point Relief

9. Generate Physical Letters

AI for HR1 Communications

Communication Vehicles

Vehicle	Primary Function	HR1 Application
Chatbots	Answer basic informational questions 24/7	Members learn about HR1 requirements, exemptions, and next steps
AI Agents	Outbound and inbound AI-powered calls	First-level handling of inbound questions; proactive outreach to non-responsive members
SMS / Email Campaigns	Deadline reminders, renewal notices, missing-document alerts	Drive timely action and improve response rates ahead of HR1 deadlines
Contact Center AI / Agent Assist	Agent assist, call summaries, knowledge search, call routing	Improve call quality and ensure consistent responses across agents handling HR1 inquiries

AI for HR1 Communications

Building a Foundation

Recommendations for Building an AI Communications Foundation

1. Adopt a common framework for evaluating AI communication capabilities

2. Maintain human oversight for high-impact or case-specific communications

3. Establish governance processes that ensure communications remain accurate, current, and policy compliant

4. Design communications that are accessible, multilingual, and centered on member needs

5. Measure outcomes and continuously improve AI performance using analytics and member feedback

AI for HR1 Communications

Guardrails: What Should AI Do?

YES

AI supporting activities within approved parameters:

- ✓ Explain approved information and simplify communications
- ✓ Provide reminders and support process navigation
- ✓ Direct members to appropriate assistance
- ✓ Help staff retrieve, summarize, or route approved information

NO

AI should not independently:

- ✗ Determine eligibility or noncompliance
- ✗ Approve or deny exemptions
- ✗ Reject documentation or issue adverse actions
- ✗ Resolve appeals or grievances
- ✗ Prevent or delay access to human assistance

AI for HR1 Communications

Data Strategy

Four Core Data Domains for AI-Enabled Communications

**Domain 1:
Trusted Policy
Knowledge**

**Domain 2:
Operational Member
Data**

**Domain 3:
External Verification
Data**

**Domain 4:
Analytics and
Performance
Measurement**

AI for HR1 Communications

AI Training Models

AI Training and Validation Models Should Emphasize the Following Behaviors

Policy Fidelity

- Accurately reflects state and federal policy

Clear and Accessible Communications

- Plain language at the 4th to 6th grade level

Language Quality

- Validated translations

Consistent Application

- Reflects approved scripts, decision trees, and response libraries

Appropriate Escalation

- Routes to human when member is confused, distressed, or in coverage loss situation

AI for HR1 Communications

Interconnectivity Standards

Core Federal Interconnectivity Standards

- NIST SP 800-47
- CMS Interconnection Security Agreement (ISA)
- ARC-AMPE (formerly MARS-E)

Considerations Before Connecting New Systems

Security Impact
Analysis (SIA)

Architecture
updates

Assessment of
data sharing with
AI or external
vendors

Review of
applicable ARC-
AMPE controls

August 17-20, 2026

AI for HR1 Communications

Benefits and Risks of Using AI

Multi-channel Outreach
Expanded Outreach Capacity
Reduced Call Center Volume
Rapid Updates as Policies Evolve
Potential Cost Savings
Freeing Staff for High-Impact Work

Incorrect Information at Scale
Public Perception and Distrust
State Labor Law and Bargaining Requirements
AI Hallucinations or Inappropriate Content
PHI/PII Exposure

AI for HR1 Communications

Factors When Considering AI Use

1. State AI Risk Tolerance

2. Prior AI Experience

3. IT Team Capacity

4. Member Acceptance

5. Staff and Member Education Needs

6. Labor agreements

7. Availability of Misinformation Safeguards

8. Ongoing Monitoring Needs

QUESTIONS...

THANK YOU!

Presentations will be posted to the conference website – www.mesconference.org - within the next few weeks.
